ACKNOWLEDGMENTS—Many persons participated in the various activities of the 1970 census. Primary direction of the program was performed by **Conrad Taeuber**, former Associate Director for Demographic Fields, assisted by **David L. Kaplan**, 1970 Census Coordinator, and in conjunction with **Paul R. Squires**, Associate Director for Data Collection and Processing, and **Joseph Waksberg**, Associate Director for Statistical Standards and Methodology.

This report was planned and written in the Housing Division under the supervision of **Arthur F. Young**, Chief, by **Aaron Josowitz**, Assistant Division Chief, **Nathan Krevor**, Chief, Tabulation, Publication, and Data Services Branch, and **Leonard J. Norry**; assisted by **Joyce A. Aso**, **Robert W. Bonnette**, **Jane S. Maynard**, and **Edward D. Montfort**.

The procedures for sample selection, sample weighting, and computation of sampling variances were developed in the Statistical Methods Division, under the supervision of **Morton Boisen**, Chief, and **Robert H. Hanson**, Assistant Division Chief, assisted by **William T. Alsbrooks**, **Peter A. Bounpane**, **Barbara A. Boyes**, and **Carlton W. Pruden**.

Geographic plans and procedures were developed in the Geography Division under the supervision of **William T. Fay**, then Chief, and **Robert C. Klove** and **Gerald J. Post**, Assistant Division Chiefs.

Data collection activities were administered by the Field Division, **Richard C. Burt**, Chief, and **Dean H. Weber**, Assistant Divi-

sion Chief, with the assistance of the directors of the Bureau's data collection centers.

Systems and processing procedures were developed under the direction of **Morris Gorinson**, Assistant Chief, Demographic Census Staff. **Florence Wright** assisted by **John F. Powell** and **Orville M. Slye**, was responsible for the clerical procedures and **Roger O. Lepage**, assisted by **Howard R. Dennis**, **Howard N. Hamilton**, **John R. Murphy, Jr.**, and **Alan Seto** was responsible for the computer programming. **Donald R. Dalzell** was responsible for the computer procedures and programs used for the electronic preparation of the tables in this report.

The manual processing and microfilming of the questionnaires and the review of tabulation controls were performed in the Data Preparation Division (formerly Jeffersonville Census Operation Division), under the direction of **Robert L. Hagan**, then Chief, with the assistance of **Rex L. Pullin**. **William L. Pangburn** supervised the microfilming operation. **Dan N. Harding**, assisted by **Nora H. Shouse**, was responsible for the tabulation review work, in which **Peter J. Fronczek** also made important contributions.

FOSDIC and computer processing were performed in the Computer Services Division under the supervision of **James R. Pepal**, Chief, and **E. Richard Bourdon** and **James W. Shores**, Assistant Division Chiefs. Development of the FOSDIC equipment was directed by **William M. Gaines**, Assistant Division Chief, and **McRae Anderson**. Devel-

opment of the automatic microfilming equipment was directed by **Anthony A. Berlinsky**.

Publications planning, editing, composition, and printing procurement were performed in the Publications Services Division, **Raymond J. Koski**, Acting Chief, by **Milton S. Andersen**, **Gerald A. Mann**, and **Wayne H. Massey**.

Important contributions were made by **Robert B. Voight** and **Sherry L. Courtland** in the planning and coordination of the 1970 census program; by **Lucille D. Catterton** in the planning of the tabular materials; and by **John W. H. Spencer**, **Sol Dolleck**, and **M. Douglas Fahey** in the systems design and operations for processing the census data.

GENERAL

This report from the 1970 Census of Housing presents data on senior citizens cross-classified by various housing and household characteristics. The data refer to the characteristics of persons 60 years old and over and the living quarters they occupy. Data are shown for the United States by inside and outside standard metropolitan statistical areas (SMSA's), States, SMSA's, and selected places. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

This report is one in a series of reports comprising Volume VII (see list on page IV). Each report in this volume concentrates on a particular subject. Detailed information and cross-classifications are generally provided on a national level; in some reports, data for States or SMSA's are also shown. For a description of the full data dissemination program of the 1970 Population and Housing Census, see Appendix D, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide vari-

ety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results. For most of the characteristics shown in this report, the changes do not, however, affect to any appreciable extent the comparability of the 1970 data with those for 1960. Further information on comparability appears in Appendix B, "Definitions and Explanations of Subject Characteristics."

Data for 1960 on persons 60 years old and over and their housing are given in the 1960 Census of Housing report, Volume VII, **Housing of Senior Citizens**. The concepts and definitions are essentially the same in both reports.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through D, which appear after the tables. Appendix A describes the various area classifications (e.g., inside and outside SMSA's, urban-rural, etc.) and also explains the residence rules used in counting the population. Appendix B provides definitions and explanations of subjects. Appendix C presents information on sources of error in the data, sampling variability, ratio estimation, and editing procedures. Appendix D summarizes the data dissemination program.

Content of the tables.—There are two types of tables in this report; one in

which the data are presented in terms of the number of persons 60 years old and over (designated by "Population" in the headnote), and the other in which the data are presented in terms of the number of housing units these persons occupy (designated by "Housing units" in the headnote).

Tables 1-36.—This section consists of 10 series (A-J) of 36 tables each as follows: tables 1 through 12 present statistics for all persons and occupied units, tables 13 through 24 for Negro persons and units with Negro head of household, and tables 25 through 36 for Spanish language persons and units with head of Spanish language.

For tables 1-36, the prefix letter "A" has been assigned to the series of tables for the United States as a whole; prefix letter "B" for inside SMSA's; "C" for the total of all central cities of SMSA's; "D" for the balance of SMSA's outside the central cities; "E" for the total of all urbanized areas in the balance of SMSA's outside the central cities; "F" for the total of all areas outside SMSA's; "G" for the total of all places of 10,000 to 50,000 inhabitants outside SMSA's; "H" for the total of all places of 2,500 to 10,000 and other urban outside SMSA's; "I" for rural nonfarm outside SMSA's; and "J" for rural farm outside SMSA's.

Tables 37-48.—These two sections (37-45 and 46-48) consist of 12 tables as follows: tables 37-38, 43, and 46 present statistics for all persons and occupied units; tables 39-40, 44, and 47 for Negro persons and units with Negro head of household; and tables 41-42, 45, and 48 for Spanish language persons and units with head of Spanish language.

In the first section (tables 37-45), summary data are shown for the United States as a whole, States,

SMSA's, and places of 100,000 inhabitants or more. In the second section (tables 46-48), detailed characteristics are presented for the States and for SMSA's of 1,000,000 inhabitants or more.

Sample size.—The statistics presented in this report are based on a sample of housing units. More specifically, the data are derived from the 15-percent and 5-percent sample questionnaires (see "Data Collection Procedures," below). The sampling rate for each subject is shown in table C of Appendix C, "Accuracy of the Data." Appendix C also presents information on the sampling variability and the ratio estimation procedure associated with these data.

Statistics for some characteristics may differ from table to table or within the same table when the figures are tabulated from different samples.

Derived figures (percents, medians, etc.).—Percents and medians as well as certain rates and ratios are shown in this report. The median, which is a type of average, is the middle value in a distribution; i.e., the median divides the distribution into two equal parts—one-half the cases fall below the median and one-half the cases exceed the median.

Medians for value and income are rounded to the nearest hundred dollars and for rent to the nearest dollar. In computing median rent, units reported as "no cash rent" are excluded. When the median falls in the lower terminal category of an open-end distribution, the method of presentation is to show the initial value of the next category followed by a minus sign; thus, for example, if the median falls in the category "Less than \$5,000," it is shown as "\$5,000—." When the

median falls in the upper terminal category of an open-end distribution, the method of presentation is to show the initial value of the terminal category followed by a plus sign; thus, for example, if the median falls in the category "\$50,000 or more," it is shown as "\$50,000+."

For all types of derived figures in this report, the figure is not presented (but indicated by three dots "...") if there are fewer than the prescribed number of units in the distribution or the base. For the 15-percent sample the minimum number of housing units is 132, and for the 5-percent sample the minimum is 400. Percents which round to less than 0.1 are not shown but indicated as zero (i.e., "—").

Symbols.—A dash "—" signifies zero. Three dots "..." mean not applicable, or that the base for a derived figure is too small for it to be shown.

DATA COLLECTION PROCEDURES

The 1970 census was conducted primarily through self-enumeration. In 1960, self-enumeration was first introduced on a nationwide scale as a substitute for the traditional census direct interview.

A census questionnaire was delivered by postal carriers to every household several days before Census Day, April 1, 1970. This questionnaire contained certain explanatory information and was accompanied by an instruction sheet; in areas with comparatively large proportions of Spanish-speaking persons, a Spanish version of the instruction sheet was also enclosed.

In the larger metropolitan areas and some adjacent counties, altogether containing about three-fifths of the population of the United States, the

householder was requested to fill out and mail back the form on Census Day. Approximately 87 percent of the householders did so. The mailed-back forms were reviewed by the census enumerator (or, in some localities, a census clerk) and if the form was determined to be incomplete or inconsistent, a followup was made. The bulk of these followups were made by telephone, the rest by personal visit. For the households that did not mail back their forms, a followup was also made, in almost all cases by personal visit and in the remainder by telephone; vacant units were enumerated by personal visit.

For the remaining two-fifths of the population, the householder was requested to fill out the form and give it to the enumerator when he called; approximately 80 percent did so. Incomplete and unfilled forms were completed by interview during the enumerator's visit.

Three types of questionnaires were used throughout the country: 80 percent of the households answered a form containing a limited number of population and housing questions and the remainder, split into 15-percent and 5-percent samples, answered forms which contained these questions as well as a number of additional questions. Some of the additional questions were the same on the 15-percent and 5-percent versions; others were different. A random procedure was used to determine which of the three forms any particular household answered.

In the metropolitan and adjacent areas, the designated type was sent to each household. In the remaining areas, the questionnaire with a limited number of questions was distributed to all households and the enumerators interviewed for the additional

questions in those households designated for the 15-percent and 5-percent samples.

PROCESSING PROCEDURES

The 1970 census questionnaires were specially designed to be processed by FOSDIC (Film Optical Sensing Device for Input to Computers). Respondents and enumerators (and for some few

items, census clerks) marked the answers in predesignated positions which could be "read" by FOSDIC from a microfilm copy of the questionnaire onto computer magnetic tape.

The tape containing the information from the questionnaires was processed on the Census Bureau's computers through a number of editing and tabulation steps (see

Appendix C, "Accuracy of the Data"). One of the end results of this operation was a computer tape from which the tables in this report were prepared on a cathode-ray-tube phototype-setting machine at the Government Printing Office. Another end result was the summary tapes which are available for purchase, as described in Appendix D, "Publication and Computer Summary Tape Program."

INDEX OF TABLES

The tables in this report are arranged in three sections. The first section consists of tables 1 to 36 and presents data for the United States as a whole and specified types of geographic areas; see Index below. The second section consists of tables 37 to 45 and presents data for States and SMSA's and for places of 100,000 inhabitants or more. The third section presents data for States and SMSA's of 1,000,000 inhabitants or more.

Index to Tables 1 to 36

Tables 1 to 12 present data for persons and housing units with household head of all races, tables 13 to 24 for Negro persons and housing units with Negro household head, and tables 25 to 36 for Spanish language persons and housing units with household head of Spanish language. The full set of 36 tables is repeated for each type of geographic area listed below; tables for the United States as a whole carry the prefix "A," tables for areas inside SMSA's prefix "B," etc.

Area	Prefix letter	Tables 1-12	Tables 13-24	Tables 25-36

Table E-2. **Age of Persons 60 Years Old and Over by Household Composition by Number of Persons in Household: 1970**

Persons—All Races

[Population. Data based on 15-percent sample, see text. For meaning of symbols, see text]

**Urbanized Areas in SMSA's—
Not in Central Cities**

Persons in all occupied housing units

Head, under 60 years

Two-person households	176 766
Three-person households	158 210
1 person 60 years and over	130 634
2 persons 60 years and over	27 576
Four-or-more-person households	402 428
1 person 60 years and over	319 622
2 persons 60 years and over	73 372
3 persons or more 60 years and over	9 434

Head, 60 years and over

One-person households	1 125 093
Two-person households	2 926 335
1 person 60 years and over	551 221
2 persons 60 years and over	2 375 114
Three-person households	684 883
1 person 60 years and over	180 423
2 persons 60 years and over	352 383
3 persons 60 years and over	152 077
Four-or-more-person households	364 198
1 person 60 years and over	133 542
2 persons 60 years and over	159 915
3 persons or more 60 years and over	70 741

Persons in owner occupied housing units

Head, under 60 years

Two-person households	127 407
Three-person households	131 446
1 person 60 years and over	108 750
2 persons 60 years and over	22 696
Four-or-more-person households	355 835
1 person 60 years and over	281 778
2 persons 60 years and over	66 129
3 persons or more 60 years and over	7 928

Head, 60 years and over

One-person households	609 589
Two-person households	2 285 880
1 person 60 years and over	430 031
2 persons 60 years and over	1 855 849
Three-person households	573 602
1 person 60 years and over	149 631
2 persons 60 years and over	297 543
3 persons 60 years and over	126 428
Four-or-more-person households	306 644
1 person 60 years and over	110 696
2 persons 60 years and over	136 848
3 persons or more 60 years and over	59 100

Persons in renter occupied housing units

Head, under 60 years

Two-person households	49 359
Three-person households	26 764
1 person 60 years and over	21 884
2 persons 60 years and over	4 880
Four-or-more-person households	46 593
1 person 60 years and over	37 844
2 persons 60 years and over	7 243
3 persons or more 60 years and over	1 506

Head, 60 years and over

One-person households	515 504
Two-person households	640 455
1 person 60 years and over	121 190
2 persons 60 years and over	519 265
Three-person households	111 281
1 person 60 years and over	30 792
2 persons 60 years and over	54 840
